

# STAG

## COMMUNITY-CREATED, TEXT-BASED VIDEO GAME ABOUT EXPLORING THE INTRICACIES OF OUR BELOVED AND EVER GROWING TOWN.

You are the *player*, transported to a Downtown Springdale Arkansas U.S.A. that has been overcome by a scourge of black ooze. Confronted with the magical talking deer STAG, you are given the purpose to rid Downtown Springdale of this ooze, which has apparently been degrading people's ability to remember; the cultural heritage of Downtown Springdale is in danger of being lost. Throughout the game, the motif of nature's reclamation of civilization is witnessed, and this repeated symbolism represents the juxtaposition of nature's pure reliance on future preservation against humankind's idolization of the past.
